👤 PROFESSIONAL SUMMARY

I am a results-driven IT professional with two complementary skill sets. On the **development side**, I build smartphone apps and websites — the kind you download from the Google Play Store or Apple App Store — using a technology called **Flutter**. On the **security side**, I help organisations protect their digital systems by monitoring for cyber threats, investigating suspicious activity, and ensuring company processes meet international security standards (**GRC**). I have completed a real-world cyber simulation with **Deloitte Australia** and hold certifications from **Google, Cisco, and EC-Council**. I am also highly proficient in **Microsoft Office (Word, Excel, PowerPoint)** and fast, accurate **data entry** — making me a reliable fit for administrative and IT support roles. Immediately available for remote or international opportunities.

🔧 CORE SKILLS

App Development	Flutter, Dart, Android & iOS, Flutter Web, GetX	Cybersecurity	SOC Analysis, GRC, Threat Hunting, Log Analysis, Phishing Detection
Backend & APIs	Firebase, REST APIs, Firestore, Realtime DB, JSON	Security Tools	Splunk, QRadar, Elastic SIEM, Wireshark
Networking	Cisco CCNA — network architecture, routing & protocols	Productivity / Office	MS Word, Excel, PowerPoint, Data Entry, Google Workspace
Maps & Payments	Google Maps SDK, Payment Gateways, FCM Push Notifications	Dev Tools	Git & GitHub, Clean Architecture, Play Store & App Store

📜 CERTIFICATIONS & TRAINING

- **Google Cybersecurity Certificate**
Google / Coursera — 6-month industry programme
- **SQL Injection & Web App Security**
EC-Council — ethical hacking & vulnerability testing
- **CCNA — Cisco Certified Network Associate**
Cisco — global networking standard
- **Cyber Security Job Simulation**
Deloitte Australia via Forage — real-world SOC experience

📁 PROFESSIONAL EXPERIENCE

Flutter Developer · **Cody Tech Solution** — *Internship*

2023 – 2024

- ▶ Built a full ride-hailing app (similar to Uber/InDrive) with separate apps for drivers and passengers — used by real people in production.
- ▶ Added live GPS tracking, trip management, and server communication so drivers and customers could interact in real time.
- ▶ Worked in an agile team to deliver features on schedule across both Android and iOS platforms.

Freelance Flutter Developer · **Independent — Local & International Clients**

2023 – Present

- ▶ Designed, built, and launched custom mobile apps for clients in Pakistan, the USA, and beyond — covering education, business, music, and lifestyle.
- ▶ Managed the full project lifecycle: client requirements → architecture → code → testing → app store publishing.
- ▶ Currently maintaining several live apps on Google Play Store and Apple App Store with ongoing updates.

★ KEY PROJECTS

ARS Roofing Platform [[USA Enterprise Client](#) · [Live in Production](#)]

- ▶ Complete digital solution for a US roofing company — a customer app, a field staff app, and a web admin dashboard, all built in Flutter.
- ▶ Admin panel allows the business to track jobs, assign staff, and view reports in real time — fully live serving a US client.

Test Master — Toppers Academy [[EdTech Platform](#) · [Live](#)]

- ▶ Online quiz and learning system: teachers create content in an admin panel; students take tests and track progress in the student app.
- ▶ Supports multiple subjects, auto-marked MCQs, and live score reporting via REST API integration.

Phishing Detection System [[Cybersecurity Project](#)]

- ▶ Tool that analyses URLs and emails to detect phishing attempts — the #1 method hackers use to steal passwords and credentials.
- ▶ Follows real SOC analyst workflows: detect alert → investigate → triage → report.

SADAA Music App [[Spotify-style](#) · [Live on Play Store](#)]

- ▶ Music streaming app with playlists, custom audio controls, and a polished modern interface — actively downloaded from Google Play.

Pupil — Wallpaper App · Games (Merging Tile, Ludo Clone) [[Live on Play Store](#) / [Closed Testing](#)]

- ▶ High-performance wallpaper browser using Pixabay API with lazy loading and image caching — published independently.
- ▶ Multiple Flutter games demonstrating complex logic, smooth animations, and multiplayer mechanics.

 LANGUAGES & AVAILABILITY

English	Professional working proficiency
Urdu	Native speaker
Availability	Immediate — fully open to remote, hybrid, or international positions
App Stores	Google Play Store (personal developer console) · Apple App Store
